

NOW YOU CAN KISS YOUR LADY FRIEND AND YOU
NEEDN'T WORRY ABOUT GERMS

VALENTINE

The Germ Killer in Use.

The pharmacists recommended a screened ring, to be placed between the lips. It is fastened to a sterling silver handle. The screen is said to have antiseptic qualities which guarantee death to germs.

The germless kiss is now offered for your kind attention. Scientists say the kiss is the playground of germs. National Pharmaceutical society proposes to cut out the dangers of the kiss.

The pharmacists will give away samples of this device at their annual ball in New York Feb. 28. But the chances are we'll all go on kissing in the same old way. Might as well kiss through a pane of glass as through a screen.
